

Premier Elite PA DP-W

Wireless Double Push Panic Button

Texecom

Designed to Perform

Instant security wherever you need it

The Premier Elite PA DP-W wireless panic button combines Elmdene's widely acclaimed panic alarm design with Ricochet® mesh technology; delivering fast, reliable wireless emergency notification.

Ideally suited to both commercial and residential applications, the Premier Elite PA DP-W wireless connectivity provides flexibility in device location and positioning. Commercial applications benefit from more discreet placement, increasing safety and security to members of staff. Residential users can deter intruders before entry is gained to the premises and avoid confrontation, by locating devices in bedrooms or near points of entry.

Outstanding features include:

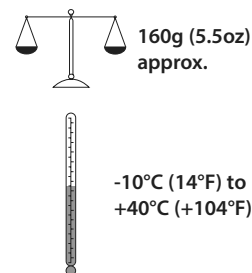

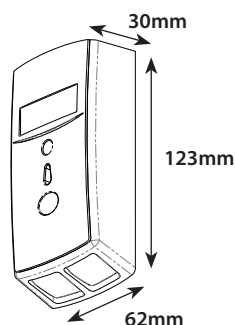

- Double push panic button
- 'ACPO 10 Point Plan' compliant
- Ricochet Mesh Technology
- EN50131-1, EN50131-5-3 & PD6662:2010 Grade 2 Class II
- Silent operation
- Compatible with Premier Elite control panels*
- Up to 4-year battery life
- Manufactured in partnership with **ELMDENE** Protecting People & Property

* Compatible with Premier Elite control panels V2.08 and above and Premier Elite XP-W wireless expanders V2.00 and above
